COMPENG 2SH4 Project – Statement of Contribution

Your Group Name _____Silver Owl_____

Your Name _____Zoe Pan_____

Your Team Member's Name _____Li Shi_____

You must complete this statement of contribution without discussing it with your project partner, i.e., individually. Your statement should be concise (at most one-and-a-half page). It has three parts:

1. Tell us about your own contribution to the development of your COMPENG 2SH4 project. For example, you can tell us about which project iterations (as mentioned in the project manual) and C++ project classes that you worked on and completed. You can provide a concise answer either in paragraph form or through bullet points.

   - Iteration 0
   - Iteration 1B
   - Iteration 2B
   - Iteration 3

2. Repeat Part 1 above but this time tell us about your project partner's contribution to the development of your COMPENG 2SH4 project.

   - Iteration 0
   - Iteration 1A
   - Iteration 2A
   - Adding & organizing the comments to the code.

3. Tell us about your experience in your first collaborated software development through this project – what was working and what wasn't. If you are a one-person team, tell us what you think may work better if you had a second collaborator working with you.

   I found that one of the things that really worked for us was how my teammate and I could share ideas and brainstorm together. It helped us solve problems more effectively because we came up with solutions that one person alone might not have thought of. We also divided tasks based on each person's strengths, which made our time management a lot better. One challenge we ran into was communication, especially when it came to keeping everyone updated about changes in the code. There were times when we got confused about who was responsible for what, or when one person's changes caused unexpected issues for others. This sometimes slowed us down and showed us that we needed to improve our documentation and version control practices. Another thing that could've gone better was having clearer and more frequent check-ins to keep everyone aligned on our progress; this would've helped avoid misunderstandings.
